

NOARLUNGA TENNIS CLUB INC.

SUN SMART POLICY

The health of members is of primary concern to the Noarlunga Tennis Club.

Noarlunga Tennis Club acknowledges that skin cancer is a major public health problem in Australia, with 2 out of every 3 people requiring treatment for some form of skin cancer in their lifetime.

Noarlunga Tennis Club recognises that skin cancer is preventable and we will actively seek to promote, encourage and support sun protection at meetings, training and competitions (local, state and national).

Where possible the Noarlunga Tennis Club will

1. Promote or supply participants and officials with sun protective clothing as part of the uniform.
2. Encourage members to use broad spectrum, water resistant sunscreen of at least SPF15.
3. Make maximum use of existing shade facilities.
4. Promote sun safety through newsletters, brochures and the website. Encourage senior athletes, coaches, umpires, officials, members and parents to be Sun Smart role models.
5. Advise competitors (and parents) about the Sun Smart Policy at registration and encourage them to comply with it.
